Wins
ICF Builder Awards 2005
International Builders Show,
Orlando, FL Jan. 2006**

ICF Builders Awards

Mr. Clark Ricks, Director, ICF Builder, Mapleton, Utah, presented the 2005 BEST HEAVY COMMERCIAL ICF Project Award to Mrs. Susanne Andres, Vice President, Insulated Concrete Solutions, for Conservatory Pond, an 85,000 sq. ft. Seniors Residence in Kingston, Ontario.

This project also won BEST OVERALL ICF Project 2005 after competing with all other Best Light Commercial and Best Residential ICF projects.

Mr. Ricks stated the overall design complexity, concrete hollow core flooring, IntegraSpec's IntegraBuck and IntegraHeader window/door buck systems with furring strips, 6" and 8" reinforced concrete cavity wall systems, stucco/masonry finish and IntegraSpec ICF's unique Exposed Concrete Face (ECF) for the elevator shafts were determining factors in winning the awards. Of interesting note is that Conservatory Pond was constructed through the Arctic conditions of a Canadian winter.

These prestigious awards are a very welcome addition to the numerous Energy Efficiency, Healthy Home, Global Traders, EnviroHome, Environmental Excellence, and EnerQuality Corporation Design Excellence Awards received for IntegraSpec ICF projects and products since 1999.

IntegraSpec ICF wall system is also on display in the National Museum of Science and Technology.
